DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention..

2. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 28; claim 2, line 3; claim 4, line 3; claim 5, line 3; claim 12, line 3, the term "said diffusion range" lacks proper antecedent basis (the recitation "diffusion matrices of different diffusion range size" at claim 1, line 10 does not recite a "diffusion range" as a claim element).

Allowable Subject Matter

3. Claims 16-19 are allowed.
4. Claims 1-15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
5. The following is a statement of reasons for the indication of allowable subject matter:

Art Unit: 2625

Re claims 1, 16, & 18 (and dependent claims 2-15, 17, & 19), the art of record does not teach or suggest the recited selection from among a plurality of error diffusion matrices of different diffusion ranges including an error diffusion matrix having the recited directivity factor.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yamada et al, Kato et al, Takahashi, and Kobayashi disclose examples of directional error-diffusion arrangements.
